Cairo, Egypt**

**Triumph Luxury Hotel
New Cairo, Egypt**

1st Announcement

Welcome Message From the President

Africa carries a significant burden of diabetes related foot complications, yet many amputations remain preventable. The Pan African Diabetic Foot Study Group brings together professionals across the continent with one shared purpose: to strengthen prevention, early intervention, education and multidisciplinary diabetic foot care.

Our vision is to build stronger networks, encourage African-led research and ensure that knowledge translates into better outcomes for patients across our continent. Cairo 2028 will provide an opportunity to learn, collaborate and shape the future of diabetic foot care in Africa.

Prof. Zulfiqarali G. Abbas
President
Pan African Diabetic Foot
Study Group

About the Study Group

Advancing Diabetic Foot Care Across Africa

Uniting healthcare professionals,
researchers and leaders across
Africa to strengthen education,
research, prevention and
multidisciplinary care for diabetes
related foot complications.

Why Attend?

Be part of a unique African and
international gathering.

Expert Scientific Sessions

Latest evidence, innovations and advances in
diabetic foot care.

Multidisciplinary Learning

Learn from specialists across surgery, wound care,
podiatry, vascular care and other disciplines.

African Research

Highlight research, experiences and solutions
from across the continent

Case-Based Learning

Real clinical challenges and practical
approaches

Networking

Meet regional and international experts

Experience Cairo

Combine learning with Egypt's history, culture
and hospitality

United for Better Diabetic Foot Care
Across Africa
